

Supplier's declaration/ Warranty

Stål & Plast A/S pays 5 years warranty on delivered ebb/flow-bench trays (called the bench trays), provided the following conditions are followed:

1. The bench trays are only used inside greenhouses covered with UV-absorbing material as i.e. glass.
2. The bench trays are covered if left empty for longer time in sunlight (24 hours).
3. The bench trays are only used for plant or similar production.
4. No fertilizer/chemicals exceeding normal use in a pot plant production is used.
5. The bench trays are max. loaded with 70 kg per m², evenly distributed over the whole tray.
6. The bench trays are NOT exposed to temperatures higher than 60 degree Celsius (material temperature).
7. The bench trays are installed in bench frames, which protect the tray edge everywhere.
8. The bench tray construction contains no screws, rivets or other sharp items that can damage the bench trays.
9. The bench trays are sub-supported per max. 500 mm (see instruction manual).
10. The bench trays are installed in the bench construction in such a way that they can "work" at temperature differences (see instruction manual).
11. That only the stated amount of glue is used, as described in the instruction manual.

Present warranty only refers to the ebb/flow bench trays. A potential compensation can max. be equal to the value of the bench tray. We can at this time also inform you that the bench trays normally last in about 13-15 years at normal use in a greenhouse.
